

## CK 2000 Model Overview

Our Rigid Stator Pump line consists of our CK, CG, CL and CM Models. Based on your piping configuration the suction housing can be rotated from 90° to 270° upon request.

The CK 2000 Model is designed to handle the heavier applications of Sewage, Industrial Waste, Polluted Liquids and Slurries. Incorporated into this more rugged pump is a drive train using Crown Gear Joint connections to the rotor and drive shaft. This Model offers a long-lasting and low-maintenance solution for a wide variety of applications.
